**Radiologist Dr. Meagan Uzee recruited to Monroe**

Monroe, LA – Dr. Meagan Uzee, a Winnfield, Louisiana native, has joined Radiology Associates of Monroe, a physician group that provides imaging-related services to Northeast Louisiana. The group provides services for St. Francis Medical Center, Monroe Surgical Hospital, Affinity Clinics, and others in the community.

After earning a Biology degree from Louisiana College, Dr. Uzee received her medical degree from LSU Health Sciences Center in Shreveport, Louisiana. Dr. Uzee completed her residency in diagnostic radiology at Texas A&M's Scott and White Memorial Hospital in Temple, Texas, and a fellowship in Neuroradiology at the Mayo Clinic in Rochester, MN.

Dr. Uzee is board certified by the American Board of Radiology, which is a non-profit, physician-led organization that oversees the certification and ongoing professional development of specialists in diagnostic radiology. She is also a member of the American College of Radiology, the Radiological Society of North America and American Society of Neuroradiology.

“Dr. Uzee brings a high level of skill and talent to our team and to the care of our patients,” said John Davis, M.D., Chairman of Radiology at St. Francis Medical Center. “Our partnership focuses on creating a caring, timely, confidential and respectful experience for our patients. Dr. Uzee has received numerous awards and honors and has been active in the communities she's served. We welcome her to Monroe and look forward to the expertise she brings to our community.”

Dr. Uzee's practice, in addition to general diagnostic radiology, will have an emphasis on diagnostic Neuroradiology. Her addition to Radiology Associates raises the total of subspecialty

trained neuroradiologists within the group to three—along with existing members Dr. Mike Barraza and Dr. Blake McGehee. The combined training pedigree and experience of these specialty trained physicians provides the area's best and most comprehensive care within the spectrum of neuro-imaging services.

### **About Radiology Associates**

Serving residents of North Louisiana since 1966, Radiology Associates is a group of 10 board-certified radiologists who partner with physicians and healthcare systems to deliver state-of-the-art diagnostic and interventional radiology services. To read more about Dr. Uzee and other Radiology Associates partners, visit our Web site at [www.myimagingpartners.com](http://www.myimagingpartners.com). The website provides links, physician biographies, exam descriptions and much more to help physicians and patients make informed and educated medical decisions.
